

TALK NOTES AAG

First, the map

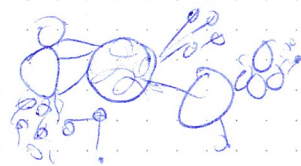

tools, precise
judgment

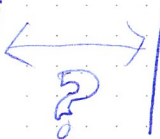

tools change, scale change
output expectation same

then (and @ same time), a spatial prog analysis

relationship emphasis
causal results of precise analysis

GIS + QUANT REV → what has
been lost b/w the trajectories of
these 2 sets of tools?

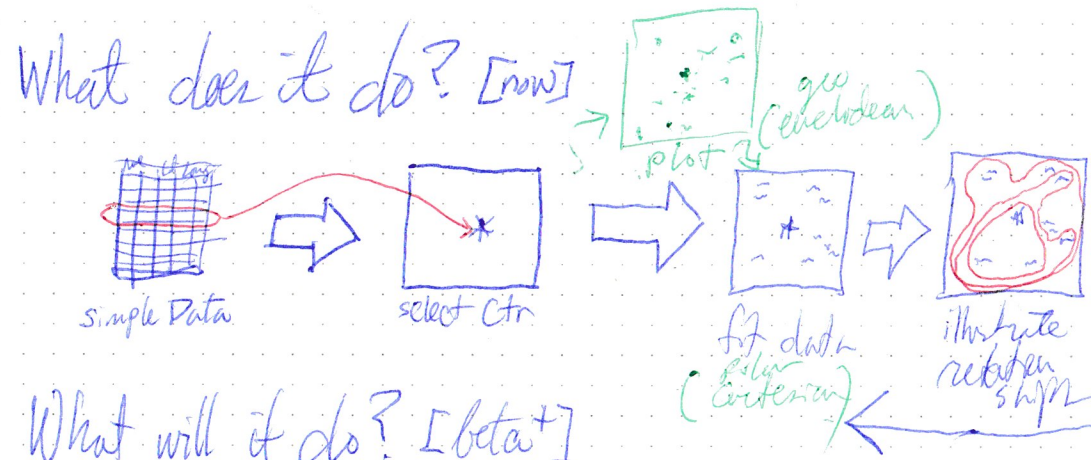

- spatial
relationships
preserved

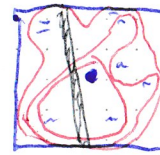

- attribute
relationships
preserved

In the spirit of GIS, this software
proj as a discursive tool to
reclaim this middle zone

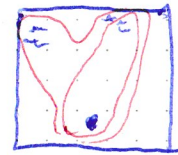

enter our techno provocation —
v0.0.1 Pseudo-Spatial ~~Mapping~~ ^{Chart Revamp}

What will it do? [beta+]

categorical
option

re-orientation

small multiplier

friendly UI

Why? For Whom?

USE CASE 1: Rando histogram

USE CASE 2: AGRO-SCI CAPITALIST

But now, the demo!

Demo data (caveat: slow step through of faster
prog, but also cleaner data)

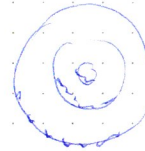

→ plot

→ polar plot

→ style

→ discussion of
bearing, dist, geodesy

future:
need for
"zhazhing"

Discussion

- how much time will we have here?
- what should we cite?
- how do we stick the landing to encourage "the right kind of questions" in Q & A?
