

TALK NOTES AG

First, the map

tools, previous
judgment

tools change, scale change
not just expectation same

then (and @ same time), spatial query analysis

relationship emphasis

counted roads of previous with
result

GIS + QUANT REV → what has
been lost b/w the trajectory of
these 2 sets of tools?

- spatial
relationships
preserved

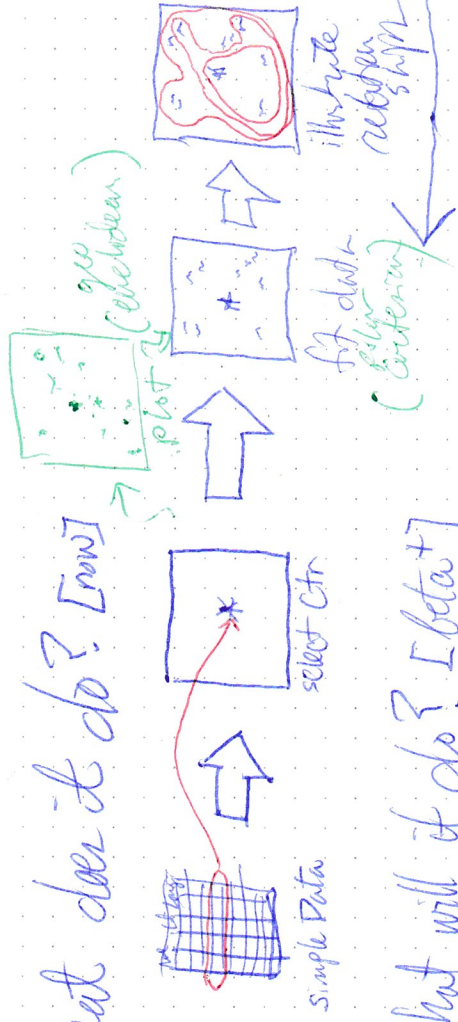

- attribute
relationships
preserved

In the spirit of GIS, the software
proj as a discourse tool to
reclaim this middle zone

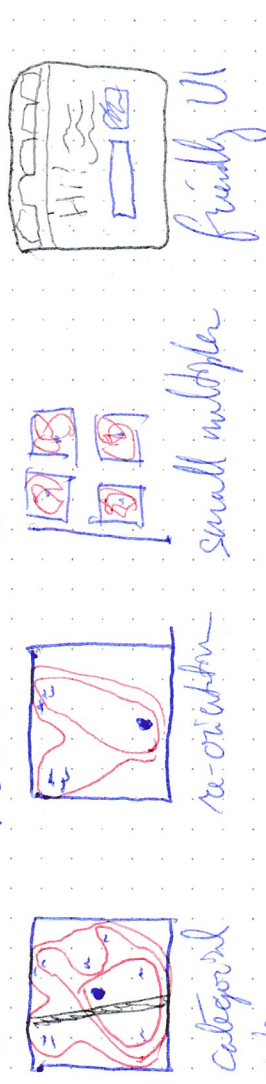

enter our techno provocation —

va-0.1 Pseudo-Spatial ~~Attracting~~ Chart Posing

What does it do? [now]

What will it do? [beta+]

Why? For Whom?

USE CASE 1: Pseudo histogram

USE CASE 2: Aggs-SCI CAPTALIST

But now, the demo!

Dense data (avoid: slow step through of factor
prog, but also cleaner data)

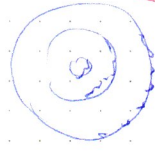

→ plot

→ polar plot

→ style

→ discussion of
bearing, dist, geography

future:
need for
"chazhing"

close
med } denigration
for } by km
[or pt/click]

Discussion

- how much time will we have here?
- What should we cite?
- how do we stick the landing to encourage "the right kind of questions" in Q&A?
